More information can be obtained from the Armenian Psychiatric Association official web page: http://www.apnet.am/eng/1/Home.html

Health Care: *Patients suffering mental disorders are treated free of charge within the framework of the State Program. Usually the patients stay at the hospitals for 24 days and after release, they can receive necessary medication at the*

Republican Psychiatric Center mentioned above. I would like to mention, that the Republican Center sometimes lacks the necessary quantity of free medication and the patients need to buy themselves. The patient can also apply to the Agency of Medical and Social Expertise (http://hhbsp.am/MainPage_2.php) of the Ministry of Labor and Social Affairs to receive disability rank and become subject of disability pension, which is rather small.
If the patient has no caregiver he can be placed in the Mental Health Hospital in Vardenis, which is for long stay patients (patients, who lost their social links, have no relatives or official representatives who can take care of them) and is under supervision of the Ministry of Labour and Social Affairs (http://www.mlsa.am).

More information regarding the health care system can be found here: Country Fact Sheet 2017.
